**Draft 2016 Debt Study**

City of Northfield, Minnesota

**Main Contact**

Nick Anhut, Municipal Advisor

# Executive Summary

## Approach

The ability to incur debt is an important finance tool for the City of Northfield. The City has issued bonds to build public improvements, acquire capital equipment, construct public facilities, and meet development needs. Debt management has two important elements. The first element focuses on the initial issuance of bonds. The second element involves monitoring to understand the needs and opportunities created by existing debt. This report examines this on-going requirement of debt management. It is being undertaken in part to help inform City decisions regarding its 2016 Bonding plans, and to provide an updated snapshot of the City's existing debt portfolio.

The report presents the results of the debt review and analysis performed for the City of Northfield by Ehlers. For this project, Ehlers analyzed all outstanding general obligation debt of the City with a special focus on property tax-supported bonds. The City routinely reviews its utility rates to measure the financial performance of those funds, so this analysis will omit detailed analysis of the City's water, wastewater and storm water general obligation debt. The purpose of the tax-supported analysis was to:

- Prepare cash flow projections for each bond issue.
- Determine if projected revenues are sufficient to pay principal and interest.
- Adjust future debt levies as appropriate in order to provide sufficient funds for future debt repayment. In some cases, this required the debt levy to be increased and in some cases, the debt levy to be decreased. Periodic adjustments are required to compensate for prepaid special assessments or to compensate for existing, adequate ending cash balances.
- Evaluate current opportunities for using cash balances in debt service funds to provide for the early retirement of debt.
- Monitor and evaluate current opportunities for refinancing.
- Incorporate information from the City's Capital Improvement and Capital Equipment Plans.
- Identify future debt management objectives.

This debt study should not be treated as an isolated undertaking, but rather part of the overall financial management strategy for the City of Northfield. Debt places demands on municipal revenues. Restructuring existing debt alters this demand. Debt restructuring may free up funds for other purposes. The needs of existing debt must be considered in planning for future capital improvement needs.

## Recommendations

The debt review and analysis points to several needs and opportunities facing the City of Northfield. The following debt management actions are recommended:

**Adjust future debt levies as appropriate and as shown on the projections.**

The projections have been constructed using currently expected flows of future special assessment revenues and future debt service requirements. The future debt levy projections have been tailored to provide for sufficient funds for future debt repayment, given any experienced prepayments of special assessments for existing projects.

The projections also include estimates of the anticipated levy support required for the City's 2016 bond issue as well as CIP street improvement projects. As final financing or projects costs become known, these projections can be updated to provide an updated estimate of the City's debt levy capacity.

#### **Continue to adopt an annual reimbursement resolution.**

The City should continue to adopt a reimbursement resolution authorizing staff to declare which projects will be financed with a bond issue.

#### **Monitor the cash balance in each debt service fund**

The City has been successfully monitoring the cash balance in each debt service fund and can call outstanding principal when sufficient funds are available. The City should continue to monitor the cash balance in each debt service fund, and use cash fund balance to call all outstanding principal for the improvement bond issues, if sufficient funds become available to pay principal and interest.

This step achieves three important benefits:

- Once the bonds are retired, any monies remaining in the debt service funds become general revenues of the City. These monies may be allocated at the discretion of the City Council.
- Future special assessment revenues also become general revenues of the City.
- The amount of improvement debt would decrease.

#### **Allocate fund balance.**

The fund balance made available by calling bonds creates a financial resource for the City. As part of the process to call the bonds, the City Council should set a plan for allocating these funds.

Allocating improvement debt service funds to a capital reserve fund will allow maximum flexibility and the ability of offset future debt needs. They may be used to moderate future levy increases, capital projects' financing or any other public purpose.

#### **Allocate future assessment revenues.**

Like the fund balance, the future assessment revenues made available by calling bonds can be used at the discretion of the City Council. Using the available assessment revenues fills financing gaps without the use of a general tax levy or other resources of the City. These funds could also be set aside and used to offset the portion of costs of future improvement projects that cannot be assessed.

#### **Monitor the annual debt issued to continue bank qualified status**

If the City issues less than \$10 million in bonds per year, the debt is considered bank qualified. Having bank-qualified status may decrease interest rates. The interest rate advantage in today's market is approximately .25% to .50%. This is not enough of a differential to stop consideration

of necessary bond issues, but it is a measurable advantage if it can be achieved. The City has considered large projects and has also been approached by the Hospital or other non-profit organizations to issue debt on their behalf – both of which would count against the \$10 million. The City should continue to monitor the annual amount of debt issued, so it can maximize the benefit of the bank-qualified status.

The City does have a policy for issuing debt on behalf of other organizations. This policy includes charging a fee for use of the bank qualification status and charging other organizations the difference in interest if the City issues non-bank qualified debt because of assisting another organization with debt issuance.

### **Be Aware of Federal Initiatives by the IRS and the SEC**

The IRS is beginning to pay more attention to local government tax-exempt bond issues. We recommend issuers adopt a post-issuance compliance policy in preparation for any IRS questionnaires or exams. The City already has been proactive in its approach to arbitrage rebate calculations relating to its interest earnings on tax-exempt debt, and has such a policy in place.

Northfield also contracts with Ehlers to file its disclosure reporting. Ehlers is not aware of any past misstatements and will actively review the City's past compliance in preparation for the City's 2016 bond offering.

Since July 1, 2014, the SEC's long-awaited Registration Municipal Advisor Rule has been in effect. The SEC has determined that anyone who provides advice on the issuance of municipal securities or financial product must be registered as a municipal advisor. As part of this initiative, the SEC has also recently adopted Rule G-42 requiring Municipal Advisors to disclose any conflicts of interest that may prevent its ability to serve in a fiduciary duty to a client. Going forward, Ehlers will disclose any perceived conflicts as they arise in relation to its engagement with the City.

No action is required of the City at this time, but we recommend the City monitor changes in the regulatory market and be aware that some third party market participants such as engineers, accountants or bond underwriters may ask to put something in writing regarding the MA rule which may allow them to offer financial advice.

## Improvement Bonds

General obligation improvement bonds are authorized by *Minnesota Statutes*, Chapter 429 to finance a variety of public improvements. State Law requires that not less than 20% of the cost of the project be assessed against benefited properties as a condition of issuing bonds. The improvement bonds do not count against the City's statutory debt limit.

While these bonds have the full faith and credit and unlimited taxing power of the City pledged for security, the primary sources of revenue to retire the debt come from a combination of special assessments against benefited property and a general property tax levy.

Property owners are given the opportunity to pay the assessment over a period of years determined by the City Council. Most of the City's assessments are paid in equal annual principal installments with interest paid on the outstanding balance (declining total payments over time). The City Council also sets the assessment interest rate at two percentage points above the applicable City bond rate per the Community Management Plan. This rate varies from year to year based upon the City's bond rates. Property owners have the ability to prepay the assessment at any time. Prepayment of the assessment is typically required when property is sold. Prepaid assessments are a major portion of the fund balances seen in the debt service funds for improvement bonds.

The analysis conducted for this report compared revenues to expenditures for all outstanding improvement bonds. The analysis relies on the following assumptions:

- Cash and investments in each debt service fund as of December 31, 2015 based on audited financial statements.
- The balance of outstanding assessments by fund as of December 31, 2015 provided by City staff.
- Future revenues including tax levies and transfers from other funds as found in the 2016 budget and the City staff background documents for the budget.
- We have projected future revenues from taxes and special assessments at a 100% collection rate.
- The projections were constructed using a calendar year basis for revenue collection and debt repayment. Typically, debt levies and special assessments are levied and collected based on a fiscal year basis, or the year ending with the February 1<sup>st</sup> principal and interest repayment. This means that funds are collected about two months in advance of when the bond repayment is due. This is done so that the City has sufficient funds on hand at December 31<sup>st</sup> in order to pay the February 1<sup>st</sup> debt service. We recommend the reader to refer to the actual debt repayment schedule and the closing memos for the individual bond issues.

The remainder of this section describes the results of the analysis for each outstanding issue of improvement bonds. The table showing the bond issues contains two sections. The first half illustrates the projected revenues and fund balance based on the recommended debt management actions. The second half of the table contains the debt service schedule for the remaining life of the bonds.

**\$3,295,000 General Obligation Improvement and Utility Revenue Bonds, Series 2007A (Fund 308)**

The 2007A Bonds were issued to fund street and utility improvements related to the 5<sup>th</sup> Street Infrastructure, 2007 MSA, and Riverside storm pond projects. The street improvement portion of the bonds is being repaid through a combination of property taxes and special assessments. The initial bond plan shows the first assessments being collected in Pay 2008 with a tax levy supporting bond repayment from 2008 to 2017 (10 years).

Maturity Date: February 1, 2018

Call Date: February 1, 2015

**Recommendation:**

1. The City has enough cash balance in this fund to reduce a significant portion of the tax levy in future years if it chooses. The schedule below shows the adjusted projected debt levy.
2. Because the call date on these bonds is February 1, 2015, the 2017 and 2018 maturities can be prepaid at anytime for up to \$20,200 in interest savings.

**\$1,530,000 General Obligation Bonds, Series 2008B (Fund 309)**

The 2008B Bonds were issued to finance various improvements from the Water Street Parking/5<sup>th</sup> Street Enhancements and Reconstruction Project and were separated into the following purposes:

1. G.O. Stormwater Revenue Bonds - Funding of approximately \$140,000 for Stormwater Improvements.
2. G.O. Tax Increment Bonds – Funding of approximately \$620,000 for various improvements in the downtown Master Development District. This portion has been 100% repaid.
3. G.O. Improvement Bonds – Funding of approximately \$770,000 for various street, water and sanitary sewer improvements.

The street improvement portion of the bonds is being repaid through a combination of property taxes and special assessments. The initial bond plan shows the first assessments beginning for pay 2009 with a tax levy supporting bond repayment from 2010 to 2019 (10 years). The 2008B Bonds were refinanced in 2015 to reduce interest costs by a total of \$27,204.

Maturity Date: February 1, 2020

Call Date: None

**Recommendation:**

1. Due to the refinancing, the City will build enough cash balance in this fund to reduce its tax levy in future years if it chooses. The schedule below shows the adjusted debt levy.

## \$4,300,000 General Obligation Bonds, Series 2009A (Fund 310)

The 2009A Bonds were issued to refund two existing bond issues (General Obligation Storm and Water Revenue Bonds, Series 2002B and General Obligation Improvement Bonds, Series 2004A) and to finance the First Street West Reconstruction Project, 2008 Improvement #5. The First Street improvement portion of the bonds is being repaid through a combination of property taxes and special assessments. The initial bond plan shows the first assessments beginning for pay 2010 (spread over five years) with a tax levy supporting bond repayment from 2010 to 2019 (10 years). The amount shown on the schedule below is the Improvement portion of the bonds. The refunding portion has been retired.

Maturity Date: February 1, 2020

Call Date: February 1, 2018

### Recommendation:

1. This fund has adequate resources to provide for the adjusted future levies as shown below.

Fund Number: 310  
Fund Title: 2009A Bonds (New Street Portion Only)

Levy Year	Collect Year	Fund Balance Jan. 1	Revenues					Expenditures			Fund Balance Dec. 31
			Levy Property Taxes	Special Assessments	Appropriated Fund Balance	1.00% Investment Interest	Total Projected Receipts	Debt Payments	Other Disbursements	Total Projected Disbursements

2/1/2020	115,000	3.00%	1,725.00	116,725.00

## \$2,305,000 General Obligation Improvement Bonds, Series 2010A (Fund 311)

The 2010A Bonds were issued to finance the Fourth Street Reconstruction Project and the Babcock Park Lift Station and Interceptor Sewer Project 2010. The street improvement portion of the bonds is being repaid through a combination of property taxes and special assessments. The initial bond plan shows the first assessments beginning for pay 2011 with a tax levy supporting bond repayment from FY 2011 to 2020 (10 years).

Maturity Date: February 1, 2021 (February 1, 2026 for waste water portion)

Call Date: February 1, 2018

### Recommendation:

- The projected levy for this bond issue was increased from the bond sale documents. Prepaid special assessments affected the levy need starting in 2015. The City should continue to monitor assessment collections to adjust future levies as necessary.

Fund Number: 311

**\$1,205,000 General Obligation Improvement Bonds, Series 2011A (Fund 312)**

The 2011A Bonds were issued to finance improvements to Linden Street North from St. Olaf Avenue to Greenvale Avenue, 2<sup>nd</sup> Street West from Lincoln Street to dead end, and Plum Street North from St. Olaf Avenue to Greenvale Avenue.

The street improvement portion of the bonds is being repaid through a combination of property taxes and special assessments. The initial bond plan shows the first assessments beginning for pay 2012 with a tax levy supporting bond repayment from FY 2012 to 2021 (10 years).

Maturity Date: February 1, 2022

Call Date: February 1, 2017

**Recommendation:**

1. The balance for this fund was sufficient to decrease levy collections from the bond sale documents. The City has enough balance to continue the reductions.
2. Because the call date on these bonds is February 1, 2017, the 2018 to 2022 maturities can be prepaid at that time and thereafter for up to \$49,100 in interest savings.

Fund Number: 312

## \$965,000 General Obligation Improvement Bonds, Series 2012A (Fund 313)

The 2012A Bonds were issued to finance improvements to 8<sup>th</sup> Street from Water Street to Washington Avenue.

The street improvement portion of the bonds is being repaid through a combination of property taxes and special assessments. The initial bond plan shows the first assessments beginning for pay 2013 with a tax levy supporting bond repayment from 2013 to 2022 (10 years).

Maturity Date: February 1, 2023

Call Date: February 1, 2019

### Recommendation:

1. The balance for this fund is sufficient to decrease future levy collections from the bond sale documents. The City should monitor fund performance in anticipation of future reductions.

## \$3,345,000 General Obligation Bonds, Series 2014A (Fund 315)

The 2014A Bonds were issued to finance street improvements as part of the 2014 6<sup>th</sup> Street Reconstruction project. A separate portion of the 2014A Bonds will also refund the EDA's Public Project Revenue Bonds, Series 2006A for interest savings.

The street improvement portion of the bonds is being repaid through a combination of property taxes and special assessments. The initial bond plan shows first assessments beginning for pay 2015 with a tax levy supporting bond repayment from FY 2015 to 2024 (10 years). The amount shown on the schedule below is for the Improvement portion of the bonds only.

Maturity Date: February 1, 2025

Call Date: February 1, 2022

### Recommendation:

- The balance for this fund is sufficient to decrease future levy collections from the bond sale documents. The City should monitor the fund to maintain sufficient balance.

**\$1,650,000 General Obligation Community Resource Center Refunding Bonds, Series 2007B (Fund 351)**

The 2007B Bonds were issued to refund the 1998A bonds which were originally issued to finance the acquisition and construction of the Community Resource Center. The bonds are being repaid by an annual property tax levy with the last levy year being 2016.

Maturity Date: February 1, 2017

Call Date: February 1, 2015

**Recommendation:**

1. The City will make its final payment on the 2007B Bonds in 2017, and no further levies are required.

Fund Number: 351

## \$3,345,000 General Obligation Bonds, Series 2014A (Fund 352)

The 2006A Bonds were issued to facilitate the construction of the Outdoor Aquatic Facility. The bonds were refunded by the 2014A Bonds for interest savings. The portion attributed to the facility is being repaid through an annual property tax levy scheduled for collection through 2023.

Maturity Date: February 1, 2024

Call Date: February 1, 2022

### Recommendation:

- The projected levy for this bond issue was increased from the refunding bond sale documents to maintain adequate balance. The City should continue to monitor balances in anticipation of future reductions in the debt service levy.

**\$6,280,000 Certificates of Participation, Series 2012B (Public Safety Center, Fund 354)**

The 2012B COPs were issued to facilitate the construction of the Public Safety Center. The certificates are being repaid through annually appropriated lease payments to a trustee. The first appropriation was approved with the 2013 budget and made during that fiscal year. The final appropriation is scheduled for the 2033 budget.

Maturity Date: April 1, 2033

Call Date: April 1, 2018

Recommendation: *None at this time.*

## Future Debt Capacity

Future Debt Capacity has been projected out to finance the City's anticipated capital needs for its 2016 projects and future CIP and CEP projects. For projection purposes, we are assuming levies that are net of projected special assessments or other contributing revenues outside of the debt levy.

### Current Debt Levies (As of June 30, 2016)

The table below shows both the anticipated levies required to provide sufficient funds for existing debt and the projected levies to support the 2016 financings. An additional line item depicts what amount could be capitalized using the potential debt levy capacity remaining if the City's total debt levy was to increase by 0% from 2018 onward. Within this constraint these projections have assumed annual issuance of Improvement Bonds along with the NAFRS Equipment identified within the City's CIP/CEP.

Given a 0% annual increase, the table above shows that there would be approximately \$7.79 million available in general funds debt capacity for future CIP projects outside of anticipated levy support for the CIP 2016 to 2020 street reconstruction projects. This debt capacity is based on a projection of 15 years of levy capacity from collections in 2019 to 2033. These expenditures could vary from year to year based on need. In each of the future street improvement bond issues, it was assumed that the repayment would be over 10 years and the bonds would be issued at 3.0-3.5% interest rates with no capitalized interest. The same information is shown on the chart below:

## Tax Supported Debt

The City of Northfield is a Home Rule Charter City and is subject to the debt limitations as set forth in *Minnesota Statutes*, Chapter 475, as well as the City Charter. The State statute provides that municipalities may incur net debt equal to three percent of estimated market value. The City’s gross bonding capacity is computed as follows:

Assessor’s Estimated Market Value (2015/2016)	\$1,235,008,000
Multiply by 3%	<u>0.03</u>
Statutory Debt Limit	\$ 37,050,240
Less: Long-Term Debt Outstanding being paid solely from taxes and appropriations	<u>(\$ 6,060,000)</u>
<b>Unused Debt Limit</b>	<b>\$30,990,240</b>

Growth in the legal debt limit results from annual increases in the City’s estimated market value.

There are certain types of issues that are not subject to the debt limit. Issues supported at least 20 percent by special assessments or tax increments, or supported by water or sewer utility revenue or state-aid allocations are not included. These excludable issues include, but are not limited to the following: improvement bonds, tax increment bonds, tax abatement bonds, obligations payable wholly from income-producing conveniences; obligations issued for the acquisition and betterment of public works systems; and public lighting, heating, or power systems.

Generally, bonds which are wholly supported from tax levies are included in the City’s debt limit.

The debt service for these obligations is provided from ad valorem taxes. Taxes certified for collection are used to pay all debt service in the following calendar year. For example, taxes certified in 2016 to be collected in 2017 will generally be used to pay interest on bonds on August 1, 2017 and the principal and interest payable on bonds on February 1, 2018.

The City has different types of bonds that are affected in various ways by this statutory requirement. General Obligation bonds and certificates are anticipated to be repaid fully by annual tax levies. General Obligation Improvement Bonds and General Obligation Tax Increment Bonds are often supported by a combination of tax levies and either assessment income or tax increment income. The City has three debt issues supported by purely by property tax levies that are subject to the debt limit.

By statute, the City must demonstrate at the time of general obligation bond issuance that revenues pledged to pay debt service will be sufficient to annually fund 105 percent of scheduled debt service. If the pledged revenues are not anticipated to fund debt service at the 105 percent level, then at the time of issuance a general property tax levy must be scheduled. The City then monitors the annual revenue performance of each bond issue to determine the need for the levy.

# City of Northfield Debt Statistics

Direct debt is the jurisdiction's own debt, while overlapping debt incorporates that of other jurisdictions having property taxing power over the same tax base. Credit rating agencies put more weight on the overall debt ratios when evaluating the debt load of a municipality. In analyzing direct debt, credit rating agencies include not only the debt that is supported by tax levies, but also improvement debt, tax increment debt, and lease revenue obligations.

<b>DIRECT DEBT</b>

2008 Energy Improvements	2,384,041
Total Lease Purchase Obligation	<u>8,484,041</u>

At end of year 2013, the City's share of total overlapping debt (includes school district and county debt) is \$30,319,715. This is approximately 2.75 percent of the full value of taxable property and is approximately \$1,473.19 per resident.

The City's net debt per capita, when self-supporting revenue debt is subtracted out by rating agencies, is less than \$600 and the total debt per dollar of market value is less than 1%. Both of these statistics are on the low end of similar Minnesota cities.

## Standard & Poor's Credit Rating

Standard & Poor's affirmed the City of Northfield's "AA" general obligation rating in August of 2014 with a stable outlook. The report issued by Standard & Poor's stated that, the rating reflects the City's:

- Weak local economy with per capita statistics below that of similarly rated entities;
- Stabilized market values after years of declines;
- Very strong budgetary flexibility and liquidity scores with excellent reserves;
- Strong management conditions with good financial policies and practices; and
- Weak debt and contingent liability profile

Standard & Poor's expects that city management will continue to make the necessary budget adjustments to at meet its strong fund balance policy and maintain general reserves in excess of 75% of expenditures. It expects that management's financial planning and conservative budgeting practices will allow the city to maintain stable operations and strong reserves in lieu of intergovernmental pressures. Given the city's stabilized local economy, strong management, and very strong fund balances, they do not anticipate potential negative or positive pressures on the rating at this time.

### **S&P New Criteria**

The 2014 report reflects a shift in S&P's methodology. In late 2013, S&P released a new criteria used to evaluate the credit worthiness of local governmental General Obligation debt. Part of the intent of the release was to provide additional transparency about the seven factors used in their evaluation. Each factor is scored from 1 (strongest) to 5 (weakest). S&P affirmed the City's "AA" / Stable rating using the new criteria in 2014.

One key factor within the criteria is called Budgetary Flexibility. Assigned 10% of the total score, this factor compares available fund balance to annual expenditures to give a sense of the amount of a municipality's capacity to tolerate financial stress. The top score is awarded for balances that exceed 15% of annual expenditures. The criteria also awards an additional overall rating boost for those who maintain above 75%. S&P calculated the City's result at over 78% and assigned the positive rating boost.

Debt and Contingent Liabilities comprises another 10% of the overall scoring. The two primary metrics used are net debt compared to annual revenues, and annual debt service compared to total expenditures. S&P calculated Northfield's net debt at 138% of annual revenues, and annual debt service is close to 18% of expenditures. Together these indicate a score of 5. An additional factor that improves the score is shortening the amortization of the City's debt portfolio: allowable when 65% of principal is to be retired within 10 years. S&P calculates the City's amortization at 68%, improving the score to 4.

While this is a low score with respect to the scale, is comparable to Ehlers's observations for the majority of MN communities.

## Future Debt Considerations

The City of Northfield is considering issuing debt for several projects in future years. The following is a list of potential projects and redemption/refunding opportunities. The types and amounts of issues are subject to change.

### 2014

- ❑ *Completed: 2014A General Obligation Refunding of EDA Series 2006A*
- ❑ Possible redemption of Series 2007A and 2007B Bonds (callable 2/1/15)

### 2015

- ❑ Redemption or refinancing of Series 2007C (callable 2/1/16)
- ❑ Annual Street Reconstruction Project Financing
- ❑ Potential Hospital Revenue Financing

### 2016

- ❑ Hospital Revenue Refunding of Series 2006 (callable 11/1/16)
- ❑ Redemption or refinancing of Series 2011A (callable 2/1/17)
- ❑ Taxable General Obligation Refunding of Series 2007D (callable 2/1/17)
- ❑ \$1.8 Million Fire Facility Capital Financing
- ❑ Annual Street Reconstruction Project Financing

### 2017

- ❑ Redemption or refinancing of Series 2008B, 2009A, and 2010A (callable 2/1/18)
- ❑ Annual Street Reconstruction Project Financing
- ❑ Potential Fire Vehicle Financing

### 2018

- ❑ Refunding of Certificates of Participation Series 2012B (callable 4/1/18)
- ❑ Redemption or refinancing of Series 2012A (callable 2/1/19)
- ❑ Potential Ice Arena Facility Financing
- ❑ Annual Street Reconstruction Project Financing

### 2019

- ❑ Annual Street Reconstruction Project Financing

### 2020

- ❑ Redemption or refinancing of Series 2013A (callable 2/1/21)
- ❑ Annual Street Reconstruction Project Financing

## APPENDIX A – Additional Debt Schedules

### \$31,930,000 Hospital Revenue Bonds, Series 2006

The 2006 Bonds were issued to facilitate the construction of two new medical clinics and provide financing to refund its Series 2001C Bonds. The bonds are being repaid through hospital revenues through 2031.

Maturity Date: November 1, 2031

Call Date: November 1, 2016

**\$960,000 Taxable G.O. Tax Increment Refunding Bonds, Series 2007D (Fund 379)**

The 2007D Bonds were issued to refund the 1999C Bonds issued to facilitate new development in establishing the Presidential Commons TIF District 1-1. The bonds are being repaid through annual tax increment collections through 2022. Municipal District 4 issued a \$50,000 advance to this fund in 2013 to offset underperforming tax increment revenues. The City may consider additional advances in the coming years until the debt is retired.

**Maturity Date: February 1, 2022**

**Call Date: February 1, 2017**

## UTILITY SUPPORTED DEBT

The City issues General Obligation debt backed solely by water, wastewater, and storm sewer system revenues under the authority of Minnesota Statutes, Chapter 444 in conjunction with annual street improvement projects and other system capital needs. Because the debt is deemed “self-supporting”, it is not counted as part of the rating agency debt burden evaluation, nor is it included in the State’s debt capacity limit. As part of recent utility rate studies, the City’s plans to evaluate the use of system cash to support future capital needs on an annual basis.
