

SECHLER PARK

2024 Long Range Plan

Project Overview

The City of Northfield has launched a long-range planning effort to develop vision, goals, and priorities for the future of Sechler Park. As part of this effort, the City will be engaging the community to better understand goals and priorities and to answer any questions regarding the potential changes to Sechler Park. This long-range plan will serve as a framework providing direction, prioritization, goals, and strategies to accomplish the community's vision.

Community voices will help shape the future of Sechler Park. There will be a number of ways you can share your input throughout the project process. Visit the project website and check back regularly for the latest news on how you can get involved in the long-range planning process.
