Re: Northfield Hockey Association Land Donation for New Ice Arena

City and School Leaders,

Thank you for pushing forward the conversation on a new ice arena for our greater Northfield community. This is a very important project for our area, and we appreciate your leadership in addressing this challenging issue. With a potential buyer for the current arena, the time is now to move forward.

Northfield Hockey Association(NHA) is excited to participate in the public/private partnership that has been developed to fund the construction of a new arena. Northfield Hockey Association is the owner of land located on Cannon Road in Northfield consisting of 6.94 acres with Rice County PID #22.11.10.54.009. This land was donated to NHA in 2017 from the Gleason family and can only be used for the construction of a new ice arena. NHA will donate this land to the City of Northfield for construction of a new arena as part of this public/private partnership. We have worked closely with the Gleason Family, and they support the donation of the land for an ice arena project. The estimated market value of this land is over \$500,000.

NHA is committed to raising additional funding for the project from private donations and has begun our fundraising campaign. We look forward to working with the City of Northfield, City of Dundas, and Northfield Public Schools to make this important community project a reality.

Go Raiders!

Sincerely,

Chris Kennelly
Chair, Arena Committee NHA

Jim Gleason
Representative for Gleason Family
