Summarize why you are interested in serving:

I am interested in serving on the Climate Action Plan Advisory Board because I am 25 and am inheriting this planet from generations of exploitation and neglect. I would like to see people of my generation and future generations live in a world that is inclusive, resilient, resourceful, and sustainable. I know that people of color and of lower class status are the first impacted by climate change, but have the least power to make change happen and that our most vulnerable communities can't wait any longer for policies at both the state and federal level to be written nor implemented. I know that it is our cultures, environments in which we were raised, beliefs, and differences are what make a community great. I am ready to take on the challenge of bringing together people from ALL walks of life and writing a climate action plan for Northfield that is resilient and sustainable.

Summarize your personal background and attributes you feel are relevant to consideration of your appointment such as community involvement, experience serving on governing boards, training, education, work history, or other personal values, experience or perspectives:

Since I was a little girl I have viewed the world through green lenses. I graduated from Bemidji State University with a BS in Environmental Studies and an emphasis in Management. From there, I held a fellowship at the College of Saint Benedict in their Sustainability Office and served as board member of the local food co-op. I started at Carleton College as their first Sustainability Program Coordinator in 2016 and shortly after became a member of the Environmental Quality Commission. My education and training to this point have closely aligned with the goals of strategic priority #6. I currently manage 11 student staff, multiple projects, and am in the process of writing a comprehensive plan for waste at Carleton- all which work to achieve the goals written in Carleton Climate Action Plan. I truly believe that my work experience and related activities make me a qualified candidate for the Climate Action Plan Advisory Board. Please let me know if you have any follow-up questions.
