

Lyceum Building - 109 E 4th Street

2025 Storm Window Replacement Project

Existing Condition

Four current front-façade and entryway wood and aluminum storm windows are not historic or easily restored and most likely date to the 1970s.

Project Plan

Hayes Window Restoration in Minneapolis will build new removable storm windows with custom-milled wood frames, glass and screen inserts, and steel exterior-attachment turn buttons.

All will be painted to match HPC-approved colors from our 2024 façade project.
