

Northfield's Climate Action Plan

What board members and commissioners need
to know

City of Northfield Strategic Priority #6

“A Community that’s Resilient and Sustainable”

Desired Outcomes:

- A clear vision for climate action
- An economy resilient to energy and environment impacts
 - Reduced carbon emissions

Action: Develop a Climate Action Plan!

HOW WILL CLIMATE CHANGE
AFFECT NORTHFIELD?

Local Impacts: Minnesota is changing: Warmer winters, hotter summers, and

Minnesota's average annual temperature 1895-2014

Source: National Climatic Data Center

Average minimum temperature in January for three Minnesota cities

More and heavier rains

Minnesota getting more rain

Change in average rainfall
from 1901-1960 to 1991-2012

- +15% Increase
- 5-15% Increase
- 0-5% Increase
- 0-5% Decrease

Source: National Climate Assessment

Timeline of Minnesota's historic mega-rain events 1866-2014

Specific threats

- Floods
- Tornadoes
- Tick-borne diseases
- Protecting water quality
- Changing urban forest
- More or different invasive species
- Increased energy use in summer

Tornado reported as wind and hail rip through central Minnesota

--GoMN March 7, 2017

Lyme-bearing tick species' expansion is especially pronounced in Minnesota

--MinnPost 1/21/2016

CLIMATE ACTION PLANNING: What can we do about it?

What does Climate Action Planning DO?

- SETS GOALS

Plus: Comprehensive Environmental Planning

- Urban forest and parks
- Water systems
- Food systems
- Transportation
- Housing
- Etc.

HOW IS THIS RELEVANT TO OUR WORK?

Adaptation

Can changes in how we manage the city's resources help protect those resources or Northfield residents from the impacts of climate change?

Mitigation

Can changes in how we manage the city's resources help us reduce GHG emissions or sequester carbon?

Heritage Preservation Commission

Threats to historic buildings from climate change:

- Flooding
- Extreme rain events
- More extreme heat events
- ???

Mitigating climate change:

- **Promote energy efficiency**
- **????**
