

Guiding Implementation – Natalie Draper

Update on John Sterner's Sculpture:

"Things are going along swimmingly! We have the bottom, and top wing framed. We have the head and tail framed. We are moving to making connectors for assembly. I hope to attach it to a base and start to skin the wings before December. It's moving quite well." John shared some short videos of his work in progress, viewable here:

And photos of the piece:

Update on Lori Greene's mosaic:

The first PARC meeting for the City Hall mosaic was on November 16th. Lori is working on sketches to present to the group for final feedback and approval. We have begun soliciting contributions to the project. These could take many forms so we've been a bit vague about what we are looking for. It would be helpful; if commissioners would share information about the project. We're hoping to have any contributions in hand by the end of December for inclusion in the piece itself—anything after that would still be included in the photographic portion of the project.

Sam Temple filmed a brief interview with Lori to help promote the project and can be found here:

There is a post on the ACC's Facebook page as well.
