

Date of Park and Recreation Advisory Board Meeting: July 20, 2017

To: Park and Recreation Advisory Board

From: Allison Watkins

Subject: Ice Arena and Pool

Action Requested: PRAB Discussion

Summary Report:

Arena:

- NHA summer hockey camps are running well for the year and had a very good participation rate.
- NHA summer camp is done August 4 and the ice will come out August 7. There are two dry floor rentals, one in August and one in September.
- The float for the condenser tank and a temperature gage were replaced in late June. Both are running fine.
- The regular season will start Sept. 25.

Pool:

- Last week the City responded to some social media activity with safety related to the pool. The City did have one incident where a foot was cut in the pool requiring a doctor's visit. Staff are continuous monitoring the pool and repaired the area of concern. The City has seen its usual scraped toes and knees like all years but no major safety issues.
- Before the season started, we had the pool joints caulked and it appears that the pool is maintaining the water level better this year.
- The Majority of the Solar Field is operating with still some minor repairs to some sections. However, with the solar field operating the City is not having to run the boilers as much. The City is saving money with the solar panels.
