Re: Fence Addition for SEU

This fence will provide Small Engine Unlimited with the additional square footage needed for storage of customers' machines, freeing space in the shop to work, and providing a more organized appearance overall. SEU is unable to expand within the building itself, and has not found a more optimal space that would fit within its budget. We are hoping, additionally that a locked fenced area would also deter the general public from leaving machines (repairable or non-repairable) outside the business by the curb or otherwise. We believe it will increase the curb appeal of the business, making it a more aesthetically pleasing view from the road.

Thank you for your consideration.

Sincerely,
Dan Lien, Owner
Small Engine Unlimited, LLC
