EXHIBIT 3

COMPENSATION

Subject to the limitations set forth in this Exhibit, CITY will compensate CONSULTANT in accordance with the schedule of fees below for the time spent in performance of services under this Contract, provided that under no circumstances shall CONSULTANT's total charges to CITY, including expenses, exceed \$_____ ("maximum price"), unless such charges in excess of the maximum price are authorized in writing by the [Position, e.g. City Engineer] before they are incurred by CITY.

[CITY will make periodic payment to CONSULTANT upon billing at intervals not more often than monthly at the rates specified in the schedule of fees included herein, provided that no bill/invoice submitted to CITY shall exceed a percentage of the maximum price equivalent to the percentage of the scope of services completed by CONSULTANT to the satisfaction of the [Position, e.g. City Engineer] as determined by CITY.]*

CITY shall be entitled to withhold five percent (5%) of the maximum price until such time as CONSULTANT has fully performed the scope of services detailed in Exhibit 1 to the satisfaction of the [Position, e.g. City Engineer].

[In no event shall the total of CITY's payments to CONSULTANT under this Contract be required to exceed a percentage of the maximum price equivalent to the percentage of the scope of services completed by CONSULTANT to the satisfaction of the [Position, e.g. City Engineer].]*

* *[NOTE TO DRAFTER: The above asterisked language may not be workable in many circumstances, as it may simply be impractical to determine the percentage of the scope of services that has been completed at a given moment (or even an approximation thereof). An alternative would be to negotiate a 'tiered' or 'phased' scope of services and compensation structure that would divide the project into several logical steps and require CITY authorization before the Consultant begins work on the next step. Such a tiered or phased scope of services would have to be drafted on a case-by-case basis.]*

Table 14: East Cannon River: 10-year Future Pipe Size Upgrades.

Proposed Pipe Diameter [in]	Pipe ID(s)	Total Length [ft]

24	41, 1442, 1461, 1717, 1906, 1953, 1954, 2150, 2981, 3080	1294
27	36, 37, 38, 213, 1317, 1350, 1439, 1703, 1727, 1731, 1956	2332

36	187, 190, 197, 359, 2927, 3085	1326
60	1785, 1786	404

There are some pipes that have proposed slope adjustments, where pipe replacement depends on the condition of the pipe. Final slope adjustments to increase pipe efficiencies should be identified during final design. These lengths are not included in the total lengths.

As mentioned previously, the Laird Stadium storm sewer network is all assumed, besides the diameter given by GIS data. Changes in this pipe network are based on these assumptions.

3. North Cannon River Watershed

Cannon Valley Place storm sewer network is proposed to be re done. Periodic shallow pipe slopes and a general lack of pipe capacity cause the junctions all along road to flood. Other proposed pipe changes include single pipe up-sizing after the upstream pond's inlet at PND-0028 and PND-0011 and increase pipe size and slope on Summerfield Drive, shown in **Figure 10.4**. There is no proposed slope adjustment.

Proposed pipe sizes range from 18 to 54 inches, replacing 12 to 48-inch pipe. The total length of proposed pipe is summed up in **Table 15**. While the capacity of pipe could be increased for a 10-year pipe design, the increase in discharge to the Lincoln Waterway for the 100-year event is negligible.

Table 15: North Cannon River: 10-year Future Pipe Size Upgrades

Proposed Pipe Diameter [in]	Pipe ID(s)	Total Length [ft]
18	929, 973, 1586	250
30	964	204
54	2105, 2106, 2107, 2108, 2111, 3229	832

There are some pipes that have proposed slope adjustments, where pipe replacement depends on the condition of the pipe. These lengths are not included in the total lengths. There are no proposed pipes to only have slope adjustments.
