Discussion

Summary Report:

April 18, 2019 presents an opportunity to discuss topics related to community development, planning, policy and priorities. If time allows, it may be of value to complete official business then move into an informal work session format for discussion. Topics may include:

- Observations of opportunities
- Shaping and enhancing communities
- Place making
- Identifying and building on “best” assets
- Attracting and incentivizing private investment to add quality of life and lifestyle benefits
- Reactive and proactive work elements and making room for priorities

I look forward to the discussion.
